

MatchUp

Where passion belongs.

The all-in-one platform for racket sports communities.
Built in Vietnam. Designed for the world.

INVESTOR PITCH · SEED ROUND · 2026

A generational platform moment for racket sports.

Pickleball is the world's fastest-growing sport. Vietnam is the world's hottest pickleball market. The 2026 World Cup comes to Da Nang in August. No dominant all-in-one platform exists. **MatchUp is positioned to win this category — and expand to all racket sports globally.**

What MatchUp Is

An ecosystem platform unifying tournament operations, multi-role community, gamification, health data, AI, and a virtual marketplace — for every racket sport, every region.

Why Now

World Cup 2026 in Vietnam. PE capital staging for M&A. No all-in-one competitor. The market leader position is unclaimed — and the window is narrow.

Part One

The fastest-growing sport on Earth.

Racket sports are entering an exponential decade. Pickleball leads. Padel follows. Tennis & badminton are scaling globally. The infrastructure layer is wide open.

MARKET TRAJECTORY

A \$9 billion market, compounding at 16% CAGR.

METRIC	2023	2024	2025 (EST.)	2033-34 (PROJ.)
Total Market Value	\$1.5B	\$2.2B	\$2.6-3.1B	\$4.4-9.1B
US Adult Players	—	36.5M	~48M	—
World Cup Nations	—	32	78	80 (2026)
CAGR	—	—	15-16% sustained	

The demographic shift that changed everything

Pre-2020

55+ retirees. "Old person's sport."

2020-2023

35-54. COVID pivot.

2024-2026

18-34 Gen Z surge. Mainstream.

2026+

Cross-generational. Olympic aspirant.

Vietnam is the #1 pickleball growth market in the world.

VIETNAM METRIC	VALUE
Pickleball awareness	88% (highest globally)
Awareness growth YoY	+152%
DUPR player growth (2025)	+184%
DUPR players (90-day)	+30%
World Cup 2026	Da Nang · Aug 30 – Sep 6
World Cup nations / athletes	80 nations · 4,000 athletes

The structural moat no competitor can replicate

- Vietnamese-built platform with native language & cultural fit
- Local relationships with hosts, clubs, federations
- Payment integrations native to the market (VNPay, MoMo)
- Government alignment with national physical-activity targets
- 12–18 month head start before any US/EU competitor can localize

Vietnam is the beachhead — not the limit.

Part Two

The infrastructure is broken.

A \$9B market is being managed with spreadsheets, group chats, and paper brackets. Competitors solve fragments. No one solves the whole.

THE PROBLEM

Hosts and players are stuck between fragmented tools.

"The game was exploding, and the infrastructure was terrible."

— Jorge Barragan, CEO of The Picklr (61+ locations), Forbes · Feb 2026

For Hosts & Organizers

- Manual member management across WhatsApp, Excel, Google Forms
- Tournament brackets break at scale (50 → 200+ players)
- No unified view across multiple groups or events
- Referee coordination, court allocation, budget — all in different tools

For Players & Communities

- No single app to find groups, join tournaments, track progress
- No persistent identity, history, or rating across events
- No reason to return weekly — engagement decays after a few sessions
- No connection between play, health, equipment, and community

The market is fragmented across four tool categories

Tournament software (PB360, Pickleball Brackets, Swish) · Rating systems (DUPR) · Community apps (TeamSnap, Heja, OpenSports) · Facility management (Court Reserve). **No one has unified them.**

THE WHITE SPACE IS THE ENTIRE ECOSYSTEM.

COMPETITIVE LANDSCAPE

No competitor offers the full ecosystem.

CAPABILITY	PICKLEBALL BRACKETS	PB360	SWISH	TEAMSAP	DUPR	MATCHUP
Tournament Engine	✓	✓	✓	✗	✗	✓
International Standard Seeding	Basic	Basic	✓	✗	✗	✓

Multi-Language (i18n native)	EN	EN	EN	EN	EN	EN + VI +

MatchUp is the only platform combining tournament-grade operations, multi-role community, gamification, health data, AI, and marketplace into one ecosystem.

Part Three

An ecosystem, not just an app.

Five roles. One platform. A flywheel that compounds with every user.

Five roles. Every new role adds value for the others.

The cross-side network effect

More hosts → more events → more players → more demand for referees and courts → more revenue for stores → more reasons for hosts to stay. **Each role makes every other role more valuable.** This is the same defensibility mechanism behind Airbnb, Grab, and TikTok.

Single-function competitors cannot replicate cross-side network effects without rebuilding the entire ecosystem.

Part Four

A platform that changes how people live.

Health data. AI. Economic ecosystem. Gamification. Five layers of unique value that no racket-sports competitor builds.

Health Data — the most valuable longitudinal dataset in racket sports.

Every session generates structured health data. At scale, this becomes a defensible, proprietary asset that no competitor entering later can replicate.

What we capture

- Calories, steps, heart rate zones, intensity, recovery
- Session frequency, duration, social context
- Injury patterns, fitness trajectory, BMI trends
- Wearable sync (Apple Health, Google Fit, Garmin)

Who values it

- **Insurers** — anonymized cohort data on activity & outcomes
- **Healthcare systems** — NCD prevention pathways
- **Sports medicine** — injury research, rehab programs
- **Governments** — physical activity policy targets

The Vietnam policy alignment

Vietnam spends ~\$20–25B/year on healthcare; non-communicable diseases (cardiovascular, diabetes, obesity) are the largest growth category. The government has set national physical-activity targets. **MatchUp directly supports national healthcare policy** — opening a pathway for government partnership and subsidized user acquisition.

AI woven into every layer — not bolted on.

Match Intelligence

AI-powered opponent matching at your level. Smart bracket seeding to eliminate mismatches. Predictive court allocation to maximize utilization.

Health Intelligence

Personalized activity coach. Injury risk signals from intensity patterns. Adaptive session goals based on fitness trajectory.

Community Intelligence

Group health scoring. ML-based churn prediction. Right-message-right-moment re-engagement automation.

Economy Intelligence

Dynamic coin and XP rewards. Personalized store recommendations. Sponsor-to-segment matching for brand campaigns.

2026

AI assistants for hosts — auto-generate schedules, brackets, announcements.

2027

Personalized AI health coach trained on MatchUp's own sport-health dataset.

2028+

MatchUp AI as a licensed health-intelligence layer for insurers, clinics, and federations.

A data platform that compounds in value with every user.

More users → better AI → better experience → more users. The same data flywheel that gave Strava, Garmin, and Peloton defensible moats in adjacent categories.

DATA ASSET	GENERATED BY	STRATEGIC VALUE
Player skill trajectory	Every match, every score	Rating system, matchmaking, coaching
Social graph	Friends, group memberships	Viral growth, churn prediction
Health & activity	Session logs, wearable sync	Insurance, healthcare, research licensing
Economic behavior	Coin flows, gifting, store purchases	Financial modeling, brand targeting
Tournament patterns	Brackets, results, formats	Sports federation insights
Venue utilization	Court bookings, session times	Real estate & venue investment intelligence
Referee performance	Match outcomes, accuracy	Officiating certification, federation reporting

MatchUp will hold the most comprehensive racket-sports behavioral dataset in Southeast Asia — and possibly globally — within 3 years of scaled launch.

An economic ecosystem — the financial rails of racket sports.

MatchUp is not just a platform. It is the economic infrastructure layer for the racket-sports community. Money, recognition, and opportunity all circulate inside the platform.

ECONOMIC LAYER	MECHANISM	INVESTOR ANALOGUE
Coin Wallet	Platform currency, bridges digital + physical	Grab credits · Shopee Xu
Gifting Economy	Social tipping — voluntary value transfer	TikTok gifts · Twitch bits
Affiliate Marketplace	Revenue share on equipment discovery	Amazon Associates
Tournament Entry Fees	Event commerce — predictable, recurring	Eventbrite for sports
Host Subscription	SaaS layer — highest margin	TeamSnap · Court Reserve
Health Data Licensing	B2B data product — long-term, high value	Strava Metro · Garmin Health

The App Store fee advantage

MatchUp Coins are classified as a **physical services wallet** (tournament entry, court booking, marketplace) — same legal structure as Grab and Shopee. Target effective App Store fee: **< 5%** vs. 30% for pure digital goods. **~\$228K/year saved at 100K MAU.**

Gamification — behavioral science with measurable health outcomes.

MatchUp treats engagement as a behavioral design challenge. Not entertainment — clinical-grade habit formation.

XP & Levels

Progress anchors — sunk-cost & progress bias

Badges

Identity formation — "I am a player"

Leaderboards

Social competition — weekly return trigger

Coin Economy

Economic stake in the platform

Streaks

21-day habit-formation science

The clinical outcome connection

"Regular moderate-intensity physical activity (3–4 sessions/week) reduces cardiovascular disease risk by 35%, type 2 diabetes risk by 40%, and depression risk by 30%."

— WHO Global Action Plan on Physical Activity 2018–2030

MatchUp's gamification system, applied at population scale, is **a public health intervention with measurable clinical outcomes** — at a fraction of the cost of pharmaceuticals or structured medical programs.

\$50K

\$5K

< \$100

Part Five

The window is now.

Five forces converging in Q3 2026. The World Cup in Da Nang is a once-in-a-decade launch catalyst. Pre-event valuation closes fast.

WHY NOW

Five forces converging at the same moment.

01

Sport Explosion

48M+ US players.
Global adoption accelerating. Every new player is a potential MatchUp user.

02

Infrastructure Gap

No dominant all-in-one platform exists.
The market leader position is unclaimed.

03

Professionalization

APP / USA Pickleball + DUPR raising standards.
Olympic pathway 2032 elevating expectations.

04

Capital Inflow

PE circling. M&A staging. First movers get acquired or become the acquirer.

05

Vietnam's Moment

88% awareness.
184% growth. World Cup 2026 in Da Nang.
Once-in-a-decade.

The World Cup window — August 30 to September 6, 2026

4,000 athletes from 80 nations. Global media. On-site activation: hosts, referees, players using MatchUp live during side events. DUPR partnership opportunity at the same venue. **Free global brand launch — at near-zero customer acquisition cost.**

Investors entering before the World Cup get pre-traction valuation. After, the narrative changes — and so does the price.

Part Six

Vietnam first. Pickleball first. Then the world.

The platform is sport-agnostic and geography-agnostic by design. The engine that wins Vietnam wins Manila, Mumbai, Manchester, and Madrid.

From beachhead to category leader in 5 years.

PHASE	YEAR	GEOGRAPHY	SPORTS	MAU	REVENUE
Beachhead	2026 (Y1)	Vietnam	Pickleball	10K – 50K	\$0.5 – 2M
SEA Expansion	2027 (Y2)	VN + Malaysia	Pickleball + Padel	50K – 200K	\$3 – 8M
Multi-Sport	2028 (Y3)	SEA + India + AU	+ Tennis, Badminton	200K – 1M	\$10 – 25M
APAC + UK	2029 (Y4)	+ UK, Japan	All racket sports	1M – 3M	\$25 – 60M
Global Platform	2030 (Y5)	Global	+ Squash, Table Tennis	3M – 10M	\$50 – 150M

Why this roadmap is achievable

- Same multi-role model works for every racket sport
- Same engine handles every tournament format
- i18n architecture is ready from day one (EN + VI, extensible)
- Health data & AI value compound across sports

The Olympic 2032 catalyst

Pickleball is on the pathway to Olympic inclusion at Brisbane 2032. Padel and tennis are already Olympic.

MatchUp positions to become the tournament-operations standard for racket sports' Olympic decade.

Part Seven

The business model.

Six revenue streams. High margin. Recurring. Defensible.

REVENUE MODEL

Six diversified streams across the ecosystem.

STREAM	MECHANISM	TIMING	MARGIN
Host SaaS Subscription	\$10–30/mo per active host	Y1	High
Tournament Entry Fees	\$1–3 per player per event	Y1	High
Coin Wallet (Top-Up)	Physical services wallet · <5% effective fee	Y1–Y2	Very High
Marketplace Commission	5–10% on equipment GMV	Y2	High
Coin Gifting (Platform Cut)	30% of voluntary tipping volume	Y2	Very High
Health Data & AI Licensing	B2B to insurers, clinics, federations	Y3+	Very High

The exit thesis

Sports community is the acquisition channel. Multi-role network effects are the retention layer. **Health data is the exit multiple.** MatchUp is positioned to be acquired by — or become — a category-defining sports-health platform within 5–7 years.

MARKET SIZING

From a \$9B TAM, a clear path to a \$150M ARR business.

\$4.4–9.1B

TAM

Global racket sports ecosystem (2033–34). All players, events, facilities, equipment.

\$200–500M

SAM

Tournament + community software (2030). 5–8% of total ecosystem spend.

\$50–150M

SOM (Y5)

APAC + global expansion. Multi-sport, multi-role, multi-revenue.

Conservative path to \$50M+ ARR by Year 5

3–10M MAU across APAC and select Western markets · 5–8% paying conversion · blended ARPU \$5–15/mo for hosts and active players · marketplace and B2B data layers compound upside.

Four layers of defensibility – compounding over time.

01 · First-Mover in Vietnam

No US/EU competitor has invested in Vietnamese localization. Home-court advantage = **12–18 month head start** before any competitor can respond meaningfully.

02 · Ecosystem Lock-In

Hosts lose community data. Players lose XP, badges, coins, friends. Referees lose track records. Court owners lose host relationships. Stores lose affiliate history. **Switching costs at every layer.**

03 · Coin Economy

Once users hold a coin balance, they have a financial reason to stay. Gifting creates social obligation. **The TikTok retention mechanic, applied to sports.**

04 · Data & AI Compounding

Every session improves matchmaking, health coaching, churn prediction. Late entrants face a permanent data deficit. **The moat widens with every user.**

No single-function competitor can match this defensibility without rebuilding the entire ecosystem from scratch.

PRODUCT-MARKET FIT ASSESSMENT

PMF Score: 82 / 100

Strong fit. Two of the lowest scores — Revenue Model and Team — are exactly the gaps that investment capital addresses.

DIMENSION	SCORE	WEIGHT	WEIGHTED
Market Size & Growth	9/10	×3	27
Market Timing	10/10	×3	30
Problem Urgency	8/10	×2	16
Solution Uniqueness	9/10	×3	27
Competitive Moat	7/10	×3	21
Home Market Advantage	10/10	×2	20
Team / Execution	6/10	×2	12
Revenue Model Clarity	5/10	×2	10
Scalability	8/10	×2	16
Network Effects Potential	9/10	×2	18
TOTAL	Weighted score		197 / 240 = 82%

Capital deployed for World Cup launch and APAC expansion.

ALLOCATION	%	PURPOSE
Engineering	40%	Full-stack, mobile (iOS/Android), DUPR integration, AI
GTM & Marketing	25%	World Cup activation, KOL, social, club onboarding
Ops & Infrastructure	15%	Scale, monitoring, compliance, CDN
Business Development	10%	DUPR, court owners, store owners, federations
Legal & IP	5%	Trademark (international), GDPR / VN cybersecurity
Reserve	5%	Bridge to Series A

12-month milestones

- iOS + Android live on app stores before World Cup
- DUPR API integration shipped
- 5–10 Vietnamese pickleball clubs as live beta partners
- World Cup 2026 on-site activation (hosts + referees + players)
- 50K MAU in Vietnam
- Malaysia GTM kickoff — Q4 2026
- Coin Wallet + Gifting Economy live
- Series A readiness — Q1 2027

THE ASK

Enter before the World Cup.

The Pickleball World Cup 2026 is a non-repeatable launch catalyst. Investors who enter now participate in pre-traction valuation, co-design the fundraising narrative, and secure first right of participation in Series A.

*After the World Cup, the narrative becomes "MatchUp after traction." Before it, the narrative is "**MatchUp owns the launch moment.**"*

THE WINDOW IS NARROW · THE OPPORTUNITY IS NOT

MatchUp

Where passion belongs.

Built in Vietnam. Designed for the world.
The all-in-one platform for racket sports communities.
